Comfort Shouldn’t Be Complicated

Purmo Plus Series Electric Radiators

With the Plus Series electric radiators from Purmo, you get heat that feels just right - natural, consistent, and perfectly adjusted to your liking.

No gas. No plumbing. No maintenance or upkeep. No noisy fans or stuffy, hot air that breathes down your neck. No blowing dust. No temperature swings or cold draughts on your feet.

Just reliable, completely silent radiant heat that feels as natural as the sun on your skin.

Experience warmth the way it should be.

Comfortable, consistent and uncomplicated.

Benefits of Purmo Plus Radiators:

EASY INSTALLATION
Takes less than 30 minutes per panel by an electrician or handyman.

OIL-FILLED & ELECTRIC
No need to run pipes throughout your house to a central boiler.

NO MAINTENANCE OR UPKEEP REQUIRED
Unlike hydronic systems, Purmo radiators are entirely maintenance free.

INDEPENDENT OPERATION
You'll never have to run a central system to keep a single room warm.

PRECISION TEMPERATURE CONTROL
Highly-accurate thermostat keeps rooms at a precise temperature with no wasted energy.

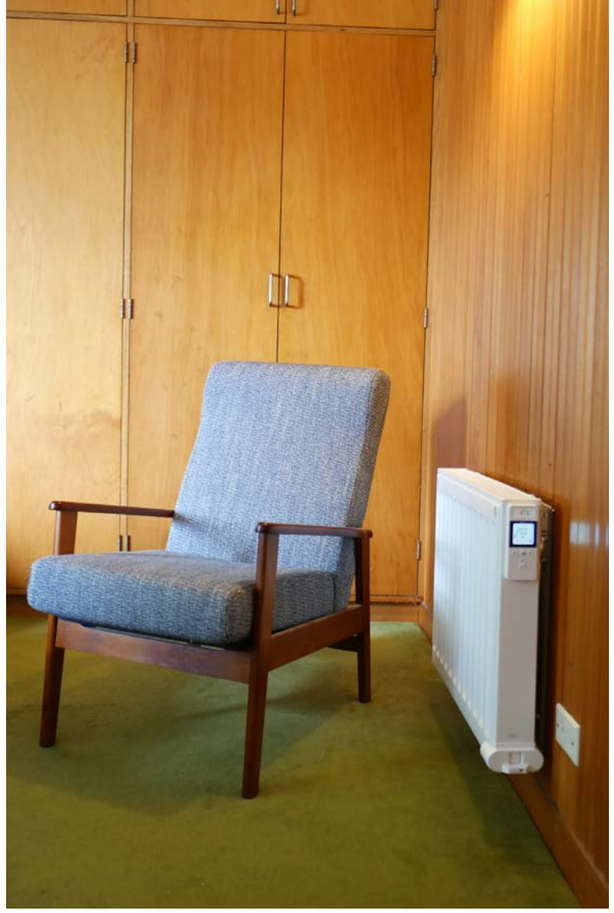

FAMILY SAFE
No blowing dust or allergens, and additional child safety modes to lower surface temperature.

CENTRAL WIRELESS CONTROL
Control via smartphone or home automation when paired with the Unisenza+ Gateway.

BUILT TO LAST
Solid steel construction, with a 10 year warranty on the panel, and 2 years on the electronics.

Radiant Heat, Redefined

The feeling of sun on your skin, the warm glow of a campfire

That's the comfort of radiant heat. Europeans have relied on central radiant heating to stay warm for decades.

But hydronic systems like these are expensive, difficult to install and reliant on gas.

Built on the same production line as hydronic panels by one of Europe's largest heating manufacturers, Purmo electric radiators deliver this exact same type of heat without the need for invasive pipes or central boilers.

Silent Precision

Thanks to a precision thermostat and high thermal mass, your rooms stay at the set temperature and no energy is wasted.

The fully-enclosed electric element means Purmo radiators operate in complete silence. There's no noisy fans, no creaking, crackling or popping.

Heat that's so consistent, silent and comfortable - you'll forget it's even turned on.

Strength Meets Style

Whether you're drawn to the classic radiator design of Yali or the streamlined, minimalism of Parada, there's a style to compliment your home.

Made in the U.K from robust, fully- recyclable steel and filled with non- toxic vegetable oil, they're built to last and designed to impress.

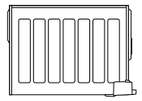

All backed by a 10-year warranty on the panel and 2 years on the electronics. Simple, sturdy, and stylish – that's our promise.

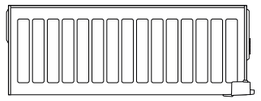

Solutions for Every Space

With 14 different sizes - there's a Purmo Plus radiator that's right for every space. Start simple with one or two radiators, or fit out your whole home.

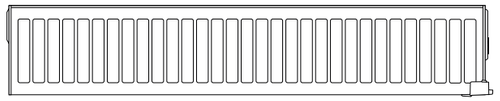

The choice is yours.

Yali Plus

ELECTRIC RADIATOR

Classic European Style

Yali Plus, the evolution of our iconic oil-filled electric radiator, blends elegance, intelligent features, and unparalleled build quality with a revamped control interface.

Retaining the original steel radiator body, sizing choices, and comforting radiant warmth, Yali Plus now boasts an expanded backlit screen, cutting- edge Zigbee 3.0 smart home capabilities, and flawless integration by smart- phone app when paired with the Unisenza+ Smart Gateway.

H300 RADIATORS

300mm high panels are low and long. Perfect for placing along hallways or under windows and countertops.

Plus Series Specifications

MATERIAL	Made from cold rolled, fully recyclable steel of the highest quality. Filled with non-toxic, biodegradable vegetable oil
COLOUR	Hard-wearing white epoxy paint (RAL 9016).
CHILD SAFETY	Control panel with child lock function Max radiator surface temperature can be lowered to 75˚C or 60˚C (will result in reduction of maximum heat output).
INCLUDED IN PACKAGE	Monclac wall brackets and screws for fixed installation
PANEL OPTIONS	Single (11), Double (21)
SPLASH RATING	IP44 when installed with wallbox splash cover (required for compliance)
WARRANTY	10 years warranty on radiator body 2 years warranty on electronics
THERMOSTAT FEATURES	Advanced digital thermostat with precision temperature control. Central control by smartphone when combined with Unisenza+ Smart Gateway and Purmo Unisenza App Weekly program can be individually adjusted in each radiator. Adaptive start with timer function. Open window function.

Optional Accessories

UNISENZA+ SMART HOME GATEWAY

Connect the gateway to your Wi-Fi router and enjoy full central control of your radiators via th new Unisenza+ smartphone app, Google Home or Amazon Alexa. You can configure zones, set schedules and monitor your energy usage.

RADIATOR HARDWIRING KIT

This kit simplifies the process of professionally hardwiring radiators. An electrician mounts the wall box behind the radiator and wires it through the wall. Features a splash guard to preserve the radiator's IP44 rating, and a replacement plug for connecting the radiator the wall box.

90° DEGREE DISPLAY ADAPTOR

The 90° Adaptor allows the display to be rotated by 90 degrees on Plus Series radiators. This makes it possible to turn the display so that it faces forward, a handy accessory for installations near walls.

RADIATOR DRYING BAR

Simplify laundry days with our Radiator Drying Bar. Compatible with our Plus Series and Kaba radiators. The steel bar easily clips onto your radiator, adding a convenient rail for quick drying of clothes and towels. Available in 3 lengths with adjustable brackets.

Panel Configurations

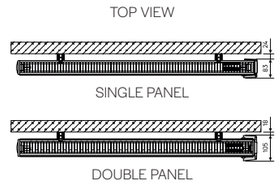

Plus Series radiators are available in double and single panel configurations

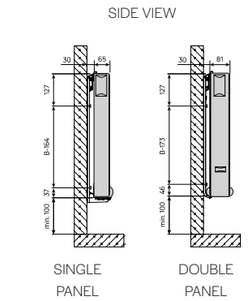

SINGLE PANEL RADIATORS

These have a slim design (95mm depth from wall), due to having single oil-filled panel, and a convection plate at the back. They're great for areas where space it at a premium, such as hallways, bathrooms or under desks.

DOUBLE PANEL RADIATORS

These have a second oil-filled panel instead of a convection plate. They're 16mm thicker than single panel radiators (111mm depth from wall). This allows you to fit more heating capacity in less wall space, ideal for rooms with more demanding heating needs.

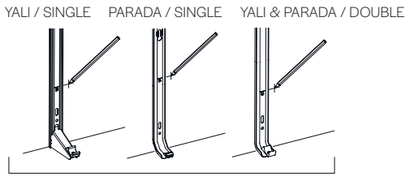

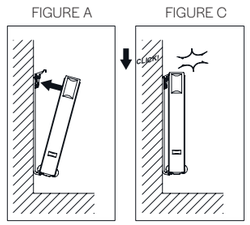

Installation

Installation of Plus Series electric radiators is simple

- Two brackets are screwed into the wall. Bracket design varies based on the selected model. (FIGURE A)
- For plaster walls, brackets should be screwed into a stud due to the weight of the radiators.
- The radiator is placed onto the bracket feet. (FIGURE B)
- The top clip is then clicked into place along the radiator top grill (FIGURE C) and tightened with an Allen key.
- Brackets can be secured at any point along the length of the radiator, provided the radiator is appropriately balanced.

Kaba

PORTABLE ELECTRIC RADIATOR

Portable Radiant Comfort

Kaba offers the warmth and style of classic hydronic radiators in a flexible, portable electric format – perfect for modern living.

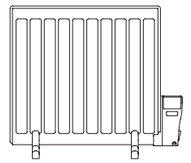

Featuring a distinctive, slimline design and high-quality steel construction, the Kaba is as much a statement piece as it is an effective heating solution.

The expansive, evenly heated surface area maximises radiant heat output, delivering a luxurious, cozy warmth that feels natural and comforting.

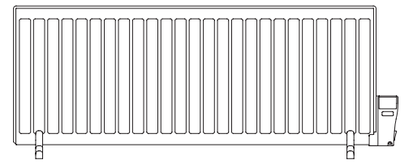

The precise PID thermostat offers multiple operating modes and energy- saving features, allowing Kaba to accurately control room temperature and reduce wasted energy.

PORTABLE ELECTRIC RADIATOR

PRODUCT SPECIFICATIONS

PRODUCT TYPE	Portable Oil-filled Electric Radiator
POWER OPTIONS	230V with plug
WIRELESS CONTROL	Not Supported
AVAILABLE MODELS	500W, 750W, 1000W, 1250W
MATERIALS	High-quality steel, filled with non-toxic vegetable oil
THERMOSTAT TYPE	Advanced electronic PID thermostat with microprocessor
OPERATING MODES	Comfort, Reduced, Frost Protection, Auto
ENERGY-SAVING FEATURES	Open-window detection, 7-day programmable timer
SURFACE TEMPERATURE CONTROL	Adjustable surface temperature, child lock available
MOUNTING OPTIONS	Standard with floor supports; optional wall-mounting bracket
HARDWIRING OPTION	Can be hardwired with our optional hardwiring kit for wall-mounted installations
COLOUR	White (RAL9016)
IP RATING	IP21
WARRANTY	10 years on radiator body, 2 years on electronic components

OPITIONAL ACCESSORIES

WALL MOUNTING BRACKET KIT

This bracket kit allows for simple wall-mounted installation of Kaba radiators. The brackets screw into the wall, and clip onto the top and bottom of the radiator - similar to installation our Plus Series radiators (see page 21).

RADIATOR DRYING BAR

Simplify laundry days with our Radiator Drying Bar. Compatible with our Plus Series and Kaba radiators. The steel bar easily clips onto your radiator, adding a convenient rail for quick drying of clothes and towels. Available in 3 lengths with adjustable brackets.

RADIATOR HARDWIRING KIT

This kit simplifies the process of professionally hardwiring radiators. An electrician mounts the wall box behind the radiator and wires it through the wall. Features a splash guard to preserve the radiator's IP44 rating, and a replacement plug for connecting the radiator the wall box.
Note - Wall-Mounting Brackets are also required for hardwiring.

Tahiti Surf

ELECTRIC TOWEL RAIL

Sleek, Minimal, Modern

A simple, stylish heated towel rail with a subtle, curved design, the Finimetal Tahiti Surf is available in a range of colours and sizes to suit any home. The high-quality steel construction is liquid-filled for even heat distribution and is powerful enough to heat your whole bathroom, not just your towels.

Customer Reviews

★★★★★

Kept in contact and updates of the order given. Lovely installer. Great after service.

Elizabeth Francis

SEPTEMBER 2023

★★★★★

Great communication, explained the system well. Tony did an excellent job of fitting the panels neatly and lef no mess.

Ian Kay

FEBRUARY 2024

★★★★★

Heaters are great, easy to use and very effective. They accurately estimated the size and capacity of the heaters for our house prior to purchase.

Kim Hughes

SEPTEMBER 2023

★★★★★

A truly great experience with Thermosoft. Always incredibly friendly and responsive, my heater system was installed perfectly and any (minor) issues I had were resolved very quickly. These heaters are amazing and give European style warmth – I love them. Thanks!

James Sarantos

MARCH 2024

★★★★★

An excellent product and top rate customer service. The panel heaters work really well as per the assessment conducted by the staff for our specific circumstances. The follup-up support has been ongoing with helpful advice and assistance to solve any problems we have had setting up and using the heaters effectively.

Lyn

SEPTEMBER 2023

★★★★★

These heaters are great, a smooth installation process with great ser- vice, they look great and work well with my solar system as well. No more hot/cold spots from a gas system that heats every room. Wish I had done this year ago.

Dee Becke

MARCH 2024

★★★★★

Great product, friendly & knowledgeable people in the company. Efficient after-sales.

Joanna Hill

SEPTEMBER 2023

★★★★★

Great customer service. Great product. Easy install. Our unit immediately solved the coldness of our bedroom. Looks good, no noise, no smell.

Graeme Smith

JUNE 2024

Our Mission

We're helping Australians make the switch to sustainable, electric heating - without sacrificing quality, comfort or style.

By providing great products and friendly, old-fashioned service, we've been able to help thousands of Australians get off gas while staying wonderfully warm and cosy in winter over the past 25 years.

Our mission now is to accelerate Australia's move to an all-electric future. To do this, we're adopting forward-thinking technologies and approaches that allow us to deliver the friendly service and brilliant products we're known for to more people than ever.

Our Story

Themosoft Australia, formerly LVI Thermosoft, was founded in Perth by Bo Ramen in 1999, later moving to the beautiful Mornington Peninsula, Victoria. Upon Bo's retirement, the business was taken over in 2012 by Stuart Wilson, a qualified electrician and his wife, Maya.

Today, operating from our Richmond headquarters, we've grown to become Australia's leading distributor of luxurious, European electric radiators.

With the help of our network of sales partners, delivery and installation partners, we've delivered comfortable, simple electric heating to thousands of Australians.

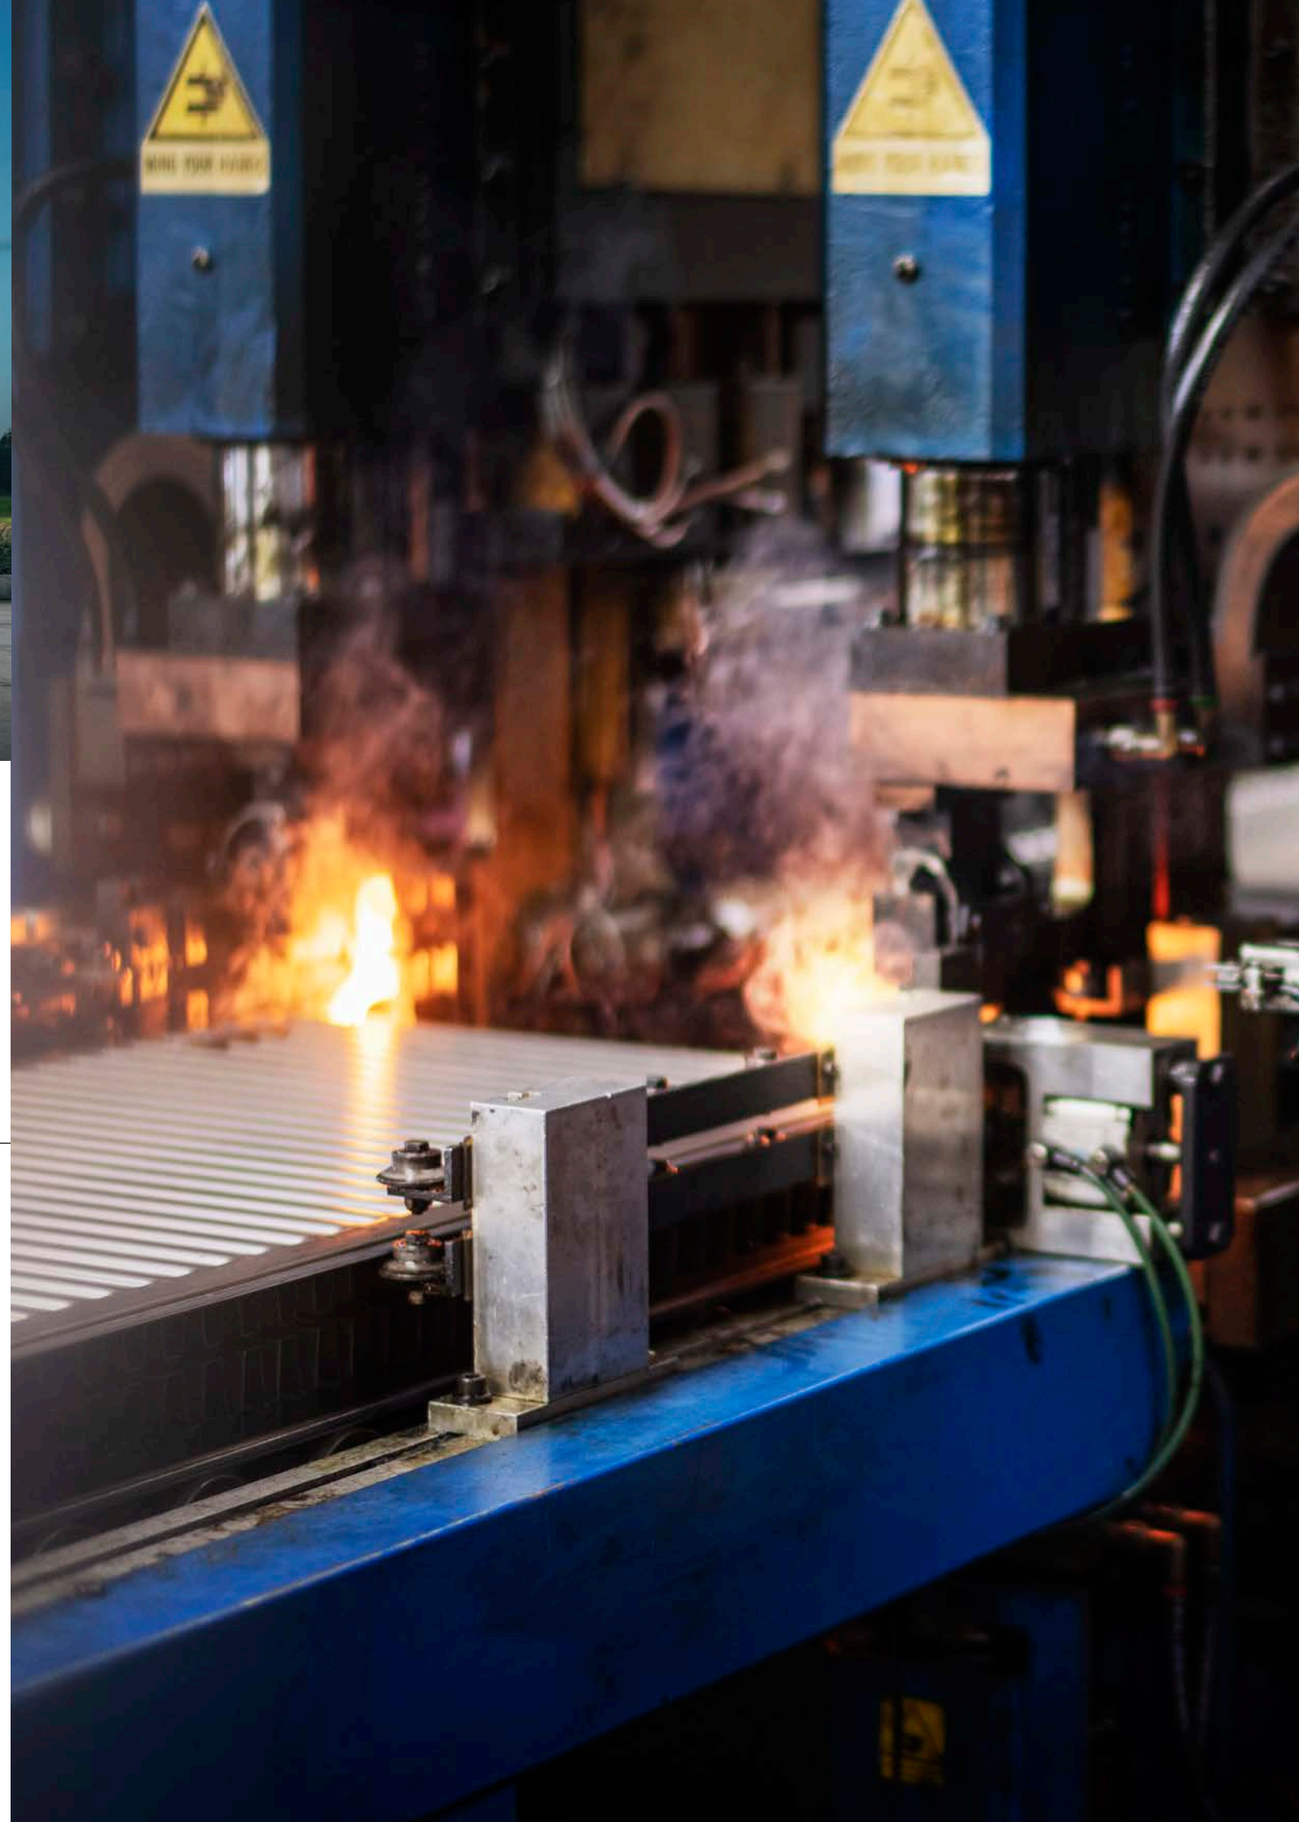

Our Supplier

Since 1999, Thermosoft Australia has exclusively distributed Purmo Group's electric radiators and FINIMETAL towel rails to Australia, offering radiant warmth with European style and top-tier quality—all at a lower upfront cost than gas hydronic systems.

Our radiators, originally sold under the LVI brand, have roots in Lidköping, Sweden, where LVI was founded in 1922. In the 1970s, they began manufacturing oil-filled electric radiators, setting industry standards for quality and performance.

Today, LVI operates as part of Purmo Group—a global leader in heating products. Our electric radiators are crafted on the same production lines in Europe as hydronic radiators, ensuring exceptional build quality and reliability.
